

AYUSH ASTHANA

CURRENT POSITION: Assistant Professor
DEPARTMENT, UNIVERSITY: Department of Chemistry, University of North Dakota
EMAIL: ayush.asthana@und.edu
OFFICE: 701.777.3199
LINKEDIN: [linkedin.com/in/ayushasthana](https://www.linkedin.com/in/ayushasthana)
ORCID: orcid.org/0000-0002-7495-1867
GITHUB: github.com/asthanaa, github.com/asthanalab
GROUP WEBSITE: theasthanagroup.com
RESEARCH AREAS: Quantum chemistry, quantum computing, computational material science
RESEARCH PROFILE: Quantum algorithms and electronic-structure methods for molecular and materials problems, with emphasis on excited states, strongly correlated systems, relativistic/heavy-element chemistry, and open-source software.

EDUCATION

AUG 2016-JUL 2021 **PhD in Theoretical Chemistry, Johns Hopkins University**
Advisor: [Prof. Lan Cheng](#)
Dissertation: Development of relativistic quantum chemistry methods for heavy-element containing molecules
JUL 2011- MAY 2016 **BS-MS Dual Degree in Chemistry, Indian Institute of Technology Kanpur**
Advisors: [Prof. Debashis Mukherjee](#) (IACS), co-advisor: [Prof. Srihari Keshavamurthy](#) (IITK)
Thesis: Multireference perturbation theory for bond breaking and quasi-degeneracy.

EMPLOYMENT

2025-2026 (6 MONTHS) **Visiting Scientist at Pacific Northwest National Laboratory**
Host: [Dr. Bo Peng](#)
Funding: NSF EPSCoR Fellow
AUG 2023-PRESENT **Assistant Professor of Chemistry (Tenure Track) and Adjunct Professor of Physics**
University of North Dakota
- Quantum algorithms for molecular and materials simulation.
AUG 2021-JUL 2023 **Postdoctoral Research Associate, Virginia Tech**
Advisor: [Prof. Nicholas J. Mayhall](#)
- Quantum computing using principles of quantum control theory

GRANTS AND FUNDING

Funding associated with my research program: \$5,115,000 in project awards (\$1,560,000 allocated to the Asthana Lab), plus \$34,000 in in-kind computing resources.

2026-2029 **ARPA-E (DOE) QC3**, "Quantum-Classical Ab Initio Co-Simulation of Unconventional Superconductors"
Role: co-PI; Amount: \$3.9 million (Asthana Lab share: **\$600,000**).
- Providing quantum chemistry and quantum algorithm solutions to bridge material simulation (NREL) and hardware implementation (INFLEQTION).
2026-2028 **NSF-NVQL**, "QSTD:Design: Attosecond Synchronized Photonic Entanglement Network (ASPEN-Net)"
Role: Key personnel; Asthana Lab share: **\$60,000**.
- Contributing in setting up minor program at UND in quantum information.
2024-2026 **NSF EPSCoR Research Fellow**, "Quantum Algorithms for Early Fault-tolerant Quantum Computers"
Role: PI; Amount: \$300,000 (Asthana Lab share: **\$300,000**).
- Developing new early fault-tolerant algorithms and chemistry use cases of quantum computing.
2024-2027 **NSF ExpandQISE (Award 2427046)**, "Quantum Algorithms for Relativistic Quantum Chemistry"
Role: PI; Amount: \$800,000 (Asthana Lab share: **\$560,000**).
- Developing algorithms for use of quantum computing in ground and excited states for relativistic quantum chemistry.
2024-2025 **Moderna Inc.**, "Accurate and scalable molecular simulations on quantum computers"
Role: PI; Amount: \$24,600 (Asthana Lab share: **\$24,600**; 6 months).
2023-2025 **Early Career Scholars Program**, UND internal funding
Role: PI; Amount: \$30,000 (Asthana Lab share: **\$15,000**).
2023-2026 **Amazon Braket compute, IBM quantum compute and NSF access**
Role: PI; In-kind award: \$5,000+\$5,000+\$12,000+\$12,000 in cloud computing credits.

PRESENTATIONS

INVITED

1. (Plenary talk) 65th Sanibel symposium, FEB 2026, “Quantum algorithms for challenging problems in ground and excited state quantum chemistry”, [abstract](#)
2. IEEE Quantum Week SEP 2025, “Quantum algorithms for quantum chemistry”
3. The University of Minnesota APR 2025, “Towards quantum chemistry using quantum computers”
4. The University of Rhode Island Nov 2024, “Towards quantum chemistry using quantum computers” [webpage](#).
5. (Keynote talk) IEEE 2024 workshop in Chemical Applications of Quantum Computing, Montreal, Canada, “Towards simulating molecular excited states on quantum computers” SEPT 2024 [webpage](#).
6. Concordia University MAR 2024, “Quantum chemistry on quantum computers”.

7. Questaal Workshop in NREL, MAR 2024, "Quantum chemistry in the era of quantum computing - opportunities and challenges", [webpage](#).
8. American Physical Society National Meeting Minneapolis, MN MAR 2024, "Towards simulating molecular excited states on quantum computers", [web](#).
9. TIFR Mumbai, DEC 2023, "Quantum chemistry in the era of quantum computing - opportunities and challenges".
10. IIT Bombay, DEC 2023, "Quantum chemistry in the era of quantum computing - opportunities and challenges".
11. University of Hyderabad, Nov 2023, "Quantum chemistry in the era of quantum computing - opportunities and challenges".
12. Pacific Northwest National Lab, Nov 2023, "Quantum chemistry in the era of quantum computing, opportunities and challenges".
13. University of North Dakota Physics, OCT 2023, "Towards molecular simulation on quantum computers".
14. (Keynote talk) IEEE Quantum Week, Workshop on Quantum Computing for Natural Sciences: Technology and Applications SEPT 2023, "Molecular excited states on quantum computers".
15. University of North Dakota, (Job talk) APR 2023, "Towards molecular simulation on quantum computers".
16. Quantum Brilliance, Germany, FEB 2023, "Towards molecular simulation on near-term quantum computers".
17. VTQ symposium, Virginia Tech, FEB 2023 "Pulse-level molecular simulation algorithms for near-term quantum computers".
18. VTQ internal seminar, Virginia Tech, DEC 2022, "Path to quantum chemistry on near-term quantum computers".
19. Applied Physics Lab, Johns Hopkins University, Nov 2022, "Pulse-level molecular simulation on transmon qubits".
20. Quantinuum (Honeywell), UK, OCT 2022, "Towards quantum chemistry on near-term quantum computers".
21. Oak Ridge National Lab, JUL 2022, "Pulse-level variational molecular simulation".
22. Virginia Tech, MAR 2021, "Relativistic coupled-cluster methods for heavy-element-containing molecules".
23. IBM Almaden Research Center, JUL 2020, "Relativistic quantum chemistry methods for heavy-element computational chemistry".

CONTRIBUTED

24. 18th International Congress on Quantum Chemistry (ICQC 2026), Berkeley, CA, JUN 2026, "Quantum Krylov using unitary decomposition for exact and tunable Krylov subspaces".
25. APS March Meeting MARCH 2025, "Advances in molecular excited state methods for quantum computers."
26. Midwest Theoretical Chemistry Conference, Purdue U, IN JUN 2023, "New method for excited-state calculations on near-term quantum computers".
27. American Physical Society National Meeting Las Vegas, NV MAR 2023, "Role of orbital-optimization molecular ground and excited-state calculations on quantum computer ([Oral presentation](#))".
28. American Chemical Society National Meeting Chicago, IL AUG 2022, "Equation-of-motion variational quantum eigensolver method for computing molecular excitation energies, ionization potentials, and electron affinities ([Oral presentation](#))".
29. American Chemical Society National Meeting Chicago, IL AUG 2022, "Minimizing pulse level variational molecular simulation ([Oral presentation](#))".
30. Molecular Quantum Mechanics (MQM), Blacksburg, JUN 2022, "Equation-of-motion variational quantum eigensolver method for computing molecular excitation energies, ionization potentials, and electron affinities ([Poster presentation](#))".
31. Quantum Information Science symposium at Virginia Tech, APR 2022, "Pulse-level variational molecular simulation ([Oral presentation](#))".
32. American Physical Society National Meeting Chicago, IL MAR 2022, "Minimizing state preparation times in pulse-level variational molecular simulation ([Oral presentation](#))".
33. American Chemical Society National Meeting & Exposition, San Francisco, CA, AUG 2020, "New algorithmic development for relativistic equation-of-motion coupled-cluster method ([Poster presentation](#))".
34. Johns Hopkins University, DEC 2019, "Development of relativistic quantum chemistry methods for molecules containing heavy-elements (Graduate Board Oral talk)".
35. Johns Hopkins University, MAR 2019, "Chemistry at ultracold temperatures (Department seminar)".

36. Indian Institute of Technology Kanpur, APR 2016, “Extended wick’s theorem, spin-free cumulants and their role in the formulation and analyzing spacial and spin correlation of many-electron systems (Master’s thesis talk)”.

RESEARCH SOFTWARE

<i>QCANT</i>	Open-source Python utilities for near-term quantum computing in chemistry and materials science.
<i>BenchmarkQC</i>	Benchmark Hamiltonians and chemically relevant correlation-regime tests for quantum algorithms.
<i>AutoGen-wick</i>	Automatic expression generation using Wick’s theorem for quantum chemical theories.
<i>CFOUR</i>	Contributor to an international quantum-chemistry software project, including relativistic spin-orbit coupled-cluster methods for heavy-element molecules.

TEACHING

FALL 2024	(Newly developed) Applied Quantum Computing (Review 5/5)
SPRING 2024	Quantum Mechanics in Chemistry (Review 4.7/5)

MENTORING

POSTDOCS	Dr. Srivathsan Poyyapakkam Sundar (since Jul 2024), Dr. Mushir Thodika (since Dec 2025)
GRADUATE STUDENTS	Prince Fredrick Kwao (third year) Sonal Jain (first year)
UNDERGRADUATE STUDENTS	Sean Glaholt (co-advised by Prof. Yen Lee Loh - Physics), Abdihakim Adan (from Concordia college)

SERVICES

NOV 2024	NSF review panel member(2024)
2024	Guest editor in Quantum Science and Technology, IOP focus issue on quantum computing applications in chemistry.
2023	Member of the editorial board for the Quantum Computing paper track for ISC High Performance 2024.
JAN-MAY 2023	Co-organized Virginia Tech Quantum (VTQ) seminar series
2020 TO CURRENT	Reviewer in NPJ Quantum Information (Nature), Chemical Science (RSC), Journal of Chemical Theory and computation (ACS), ACS Central Science, Journal of Chemical Physics (AIP).
APRIL 2022	Co-organized Virginia Tech Quantum (VTQ) symposium, a two-day symposium with more than 40 participants from the Department of Physics, Computer Science and Chemistry

ACHIEVEMENTS

DEC 2024	UND early career scholar award.
NOV 2024	NSF Epscor research fellow award.
MAY 2016	Best master’s project award, Department of Chemistry, IIT Kanpur.
2011-2016	Awarded <i>INSPIRE-SHE Scholarship</i> worth \$6000, Department of Science and Technology, Government of India.
